COMMISSIONERS

Over 600 Citizens in Public Meeting Decide by Vote of 90 to 86-Metion to Lay on Table Resolutions Endorsing the Board Was Lost-A. S. Spalding Defended Actions of the Board Regarding Electric Light Contract-Citizens Shed Light on Subject From Many Angles.

Between 600 and 700 men in the cut in the trench at the works, cutting citizens' meeting in the town hail on Monday evening shouted so voiferously and in such equal volume that Judge Lucius Brown, who was chairman could not declare the vote, but the same citizens cast only 175 votes when called upon to pass before the desk to register their approval or disapproval of a motion that in effect ed at once that the speaker would be approval of a motion that in effect endorsed the board of gas and elec-trical commissioners in making a new contract for the city's supply of elec-tricity from the Uncas Power Co. Resolution Offered.

What they were voting on was to lay on the table the resolution offered by Thomas M. Shields at the beginning of the meeting as follows:

Whereas, the citizens of the town of Norwich, assembled at the call of the Chamber of Commerce to consider the metters growing out of a contract the Chamber of Commerce to consider the matters growing out of a contract with the Uncas Power company for the purchase of electricity, having full confidence in the honesty, integrity and ability of the board of gas and electrical commissioners to deal with these questions and as it is a matter entirely for which said board are re-sponsible and over which they have full authority:

full authority:

Voted, it is the sense of this meeting that all of the said matters relating to the said contract be referred to said board of gas and electrical commissioners for their determination without advice on our part as to what action said board should take in the premises. premises. The motion to lay this on the table was defeated 90 to 86, amid applause

as the vote was announced.

Then the meeting proceeded to pass the original motion and adjourned at once at 19.05 o'clock.

President Somers Explained Call. President William A. Somers of the Chamber of Commerce called the meeting to order a few minutes after 8 and explained its purpose in the fol-lowing words: Owing to the lack of time officially

to call a city meeting it was requested and voted at a meeting of the Cham-ber of Commerce last Friday night that a call for an open meeting be ad-vertised and held in the town hall on Monday. The spirit and reason of the meeting is, I am informed, for citizens interested in some certain civic af-Monday. fairs to express and explain their

Judge Brown Chairman.

He asked for nominations for chair nan and after he had himself been nominated but declined to be considered. Judge Lucius Brown was elected chairman on motion of C. D. James Judge Brown said he wanted to take no time from what was required by others for discussion but he thought it augured well to see such a gathering of citizens. He asked that remarks made should be temperate and to the point. and to the point. C. D. James was elected clerk of motion of W. W. Beckwith.

Offered Resolution. Thomas M. Shields offered the res-olution referred to above, speaking first briefly before he read it. first briefly before he read it.

He said that, according to law the administration of the gas and electric light department was given over to the commissioners and as far as he knew they had not asked for our advice. They were appointees by the mayor, and as far as the speaker knew they were honestly trying to do the best they knew.

There was no doubt, said Albert Boardman, as he took the floor, that the law gave the gas and electrical commissioners the righty to manage this department but he thought the public had a right to call them to ac-

Felix Callahan rose to a point of order that the next business was to accept or reject the resolution.

Chairman Brown ruled that discussion of the resolution was in order.

Mr. Boardman went on to say that we had a right to say what we thought about the board of gas and electrical commissioners. They may be honest and able but sometimes they don't act like it, and they are open to criticism. They can no doubt do as they please, but we have a right to express our

public opinion.

There is a division in the board and you ought to vote down this resolu-tion though the board can then do as they like

Spalding Defends Commissioners. A. S. Spalding, secretary of the board of gas and electrical commissioners who had been stading with his finger in the air while Mr. Boardman had been speaking, got the floor as soon as Mr. Boardman stopped talking. Mr. Spalding was applauded as he walked to the front and read the following statement which he had prepared, speaking with vehemence as

pared, speaking with vehemence as he defended the action of the commis-sioners and shed much light upon the gas and electric plant:

The Old Commissioners. Much has been said about the old commissioners in comparing them with the present board. In the first place the old commissioners resigned their office. No force was used in having them do so. At once much was said and at the time the public, at least some of those not in sympathy with the new men, berated the new commismissioners. Among other faults as laid to their door, some at least it was stated were politicians, as you will recall at the time letters were published and much was said about the men placed in charge of this department and a little later the superintendent resigned. This resignation of the superintendent came without warning or Much has been said about the old perintendent came without warning or expectation by the board. Then at once speculation was rife as to who would be appointed superintendent, and it was said by many at the time that the speaker on account of politics would be appointed. As developments came out, the board appointed a practical man and it would seem sure that the assertion as made at the time, that politics had a hand in it, was not a correct statement. was not a correct statement.

Cashier Resigned. A little later the cashier resigned, publishing in the papers a letter which placed the commissioners in a bad light, and if he is here tonight I would ask him whether there was ever at any time, anything said or done by the board which would call for any comment by either himself or the public, and which would require him to resign.

Attempts to Crippia Service.

Attempts to Cripple Service,

Within the year after the present board had taken up their duties, many accidents happened to the lights on a Saturday night, some of those happenings were not accidents but were deliberate attempts to cripple the service, injure the city and above and beyond all bring censure and trouble upon the department. To illustrate, wires were cut at the Boston store, putting out one circuit on a Saturday night. A rope attached to a board was

little happenings occurred which showed some person or persons were intent upon injuring or crippling the department that the public would be in a position to blame the board.

When the cashier resigned, the same reports became current and many stated at once that the speaker would be appointed to that office, but as a matter of fact, the gentleman was appointed who now occupies the office and it is fair to say that the question of politics was not considered.

of politics was not considered. Plant Not Up to Date Now The majority of the people of Norwich it is presumed think we have a modern and up to date plant. Such is not the case and as a matter of fact our plant, even though it hurts to make the statement in public, is not such as Norwich should have.

Under Bonds.

On the question of a contract about which so much has been said, I trust this meeting will recollect that the board of commissioners are under bonds of \$5,000 each and the intent and purpose of the bonds are that they shall perform their duties entirely to the credit and for the good of the city of Norwich. I wonder if the men upon whom the calling of this meeting depended are aware of this fact. It is something unusual for the city of Nor-wich to usurp the duties of a commis-sion by a meeting entirely without authority over the commission, and a meeting the result of which might em-barrass the commission to such an extent, that in the end, the city of Nor wich may suffer a financial loss.

Contract Not Closed. Now the contract about which so much has been said is not a closed knowledge at least, no one knows ujst what will be done. I am afraid that so much delay, so many unpleasant words have been said and written and so many dirty lines have been in the public wash that when it is all over public wash that when it is all over the city of Norwich will be the loser It is to be expected that with a com mission of five members, there may be questions upon which a division of opinion may be expressed, and now we come to the point at issue. The pa-pers have had much to say, informa-tion as we understand it coming mostly from one particular member of the commission, although it was agreed by the commission at their first or nearly first meeting, that any informa-tion as given the papers would be furnished by the secretary of the con

Offered to Read Minutes.

Now while it does not appeal to m now while it does not appeal to me to have it done, but considering the fact that so much has been said and published. I have with me the book containing the records of the meetings and will ask the commissioners present if they have any objections to the reading of the mean objections to present if they have any objections to the reading of the minutes. I will ask them here in public, name by name, to say to this meeting whether they are willing for this to be done or not. If there is a nigger in the wood pile, this meeting may have an equal chance with us all, I for one have nothing hide and stand before the citizens this city, confident that when this is all over and settled my reputation for honesty will not be questioned over

this affair. City May Lose Financially. ow to close, the commis you all know have a meeting tomor row night, while any action taken here might not prove an embarrassment much harm it occurs to me has al-ready been done by the besmirching and insulting newspaper articles and letters; and I hope that those who nay vote for any resolution which may be brought up for action, will consider the delicate position this meeting oc-cupies and the fact even though their personal or political enmity is against

the commission, that possibly, beyond all this, the city of Norwich may lose, both financially and in other respects.

Read Minutes of Meetings. Mr. Spalding called the commission ers name by name to answer whether they were willing to have the records of the meetings read and when all had answered giving no objection, he of the meetings read and when all had answered giving no objection, he proceeded to read the minutes of all the meetings of the commissioners since Jan. 1, 1916, showing the successive stages in the negotiations on the new contract proposed with the Unicas Power Co.

Uncas Power Co.

Hs asked if there was anything in the records that showed any of the dishonesty that had been talked around the street. This it was that Mr. Beardman had hinted at as far as he dared, said the speaker.

If you think I'm dishonest, said Mr.
Spalding, you can proceed against me under the \$5,000 bond which I have

under the \$5,000 bond which I have given as a commissioner.

There were other questions, Mr. Spalding continued, that he would have liked to go into, but they might embarrass the meeting of Tuesday night. He was speaking for himself and what he said he had spoken honestly for himself as a matter of personal privilese.

sonal privilege.

Judge John H. Barnes took the floor and put the audience in a good humor with a funny story. When he heard of the trouble and talk on the street and learned that the majority of the board were democrats he felt like wiking what could you constitute the street. of the board were democrats he left like asking, what could you expect? (Laughter.)

Mr. Barnes went back into the legislative history of the Norwich Gas and Electrical company and the acquirement of the property by the city. He discussed the city's original electrical company with the Unions Power with the Unions Power. ity contract with the Uncas Power company which was for 1.1 cents for the first 2,200,000 kilowats, and 1 cent the first 2,200,000 kilowats, and 1 cent over that. This contract was not renewed upon expiration, and the result, said Mr. Barnes, was to leave the Uncas Power Co. high and dry without a customer for their product. The company was brought face to face with two alternatives—to sell their product to the city at whatever price the city wished to pay for it or go into bankruptcy. It chose to take the city's price of one cent flat and since that time has been conducting a losing business

ing business
Live and let live! Let the city
make a fair profit and let the Uncas Power cempany make semething, too. The slogan of this worthy organization, the Chamber of Commerce, is to trade at home. Employ home industry. The Uncas Power company is owned by home capital. I think we owe them a square deal and just so long as the Uncas Power company is willing to meet the city of Norwich. willing to meet the city of Norwich half way, we, as citizens of Norwich are in duty and honor bound to trade with it. Let us think twice before our action results in ruining a home built and home dependent business.

Mayor Murphy's Position. Mayor Murphy was the following speaker, stating that he wished to ex-plain his position. He had not known of this meeting until he saw it men-tioned in the papers, but he objected to any 20 year contract, and when he was told that one for that term had been offered he at once called up all the members of the board. He communicated with them all except Dr. Donohue. Him he called three times without getting him, and he also left a call for him, but never received the

a call. The price of electricity was going down, said the mayor, and cities are saving large amounts for that reason. He said that he had appointed the men on this commission and he had an object in doing so. He was not ashamed of his appointments, but he would be ashamed if they had tied the city up to a 20 year contract.

While the commissioners were conferring with Mr. Comstock, representing the Unicas Power company, did the corporation counsel know anything about it, and where was he? inquired the mayor. (Applicuse.)

When Power is Received.

When Power is Received.

Holding up a statement which he said was vouched for by Supt. S. J. Kehoe of the gas and electric plant, Mayor Murphy read the figures showing when the city had received electric power from the Uncas Power company. In January and February it was part power, March, April and May complete power, for the next six months ne power, and in December part power. The company has furnished 57 per cent. of the power in a year and the city plant 43 per cent, according to his figures.

It would be making a contract with a bankrupt concern if one were made with the Uncas Power company, the mayor said. He didn't question the integrity but the judgment of the commissioners.

The mayor declared that the city with the mayor declared that the city without an axe to grind will tell you so.

It would be making a contract with a bankrupt concern if one were made with the Uncas Power company, the mayor declared the city without an axe to grind will tell you so.

It would be making a contract with a bankrupt concern if one were made with the Uncas Power company, the mayor declared the city will tell you so.

It would be making a contract with a bankrupt concern if one were made with the Uncas Power company, the matter that facchates and compels and lustre that facchates and compels and lustre that facchates and compels and lustre that facchates are city of the first application will tell you so.

The would be maki

The mayor declared that the city plant was worth \$1,000,000, and also took occasion to say that he considered a man who wrote to the paper without signing his name a sneak.
In conclusion, the mayor said he would have no objection to a contract for two or three years, but he objected to a longer term. Hot Shot from Mr. McWilliams.

John, McWilliams, one of the former commissioners who resigned, said he agreed with the mayor that the city plant could be run without any outside power and there were probably 300 men in the city who could run it—not only three or five.

Mr. McWilliams read a newspaper

(Continued on Page Eight) REMOVES QUARANTINE Visitors Are Now Permitted at Tu-

berculosis Sanatoria.

Hartford, Conn., Feb. 7.-The state tuberculosis commission at it smeet-ing today decided to remove the quarantine against the admission of visi-tors to the state tuberculosis sana-toria, in force since the outbreak of the epidemic of grip.

The commission has a large waiting list of advanced cases for admission to the sanatoria. The necessity of providing more room will be brought to the attention of the general assembly at the next session.

AT DAVIS THEATRE.

Vaudeville and Photoplays. An attractive vaudeville bill at the Davis theatre on Monday had good sized houses that were well pleased with the offerings. The Dixie Four, purveyors of melody and comedy, were in the topline place. Braniey and Meredith, girls, who danced and sang their way into the good groces of those who saw them, had a pretty costume change specialty and Herold costume change specialty, and Harold Yates had a novelty singing, whistling and dancing turn.

A great picture of the Canadian Northwest was on the picture bill, giving five reels of a fine production, and there was a Keystone reel that was packed full of the best known comedians in the country. Seventh Grade Room Closed. The seventh grade room at Broad-way school, which is taught by Miss Jennie L. Spencer was closed on Monday for three weeks because of a case scarlet fever. The Spur of Necessity.

Freedom to do exactly as one chooses,

such zest as the fact that things must be done and are given into our hands to be accomplished. Stationary Science. A medical student once asked the late Prof. Parker Cleveland if there were not more recent works on anatomy than those in the college library. "Young man," said the pro-

fessor, "there have been very few

SERV-US MINCE MEAT

Package condensed mince meat is made up today of the best quality of dried fruit and other items which can be found, all of which are found in the United States with the exception of spices and currants. The study of packing condensed mince meat has ex-tended over a period of 100 years and today is as near its perfection as we can possibly conceive. The sanitation in the factories in which it is packed is beyond reproach as the competition today in these lines necessitates the guarding of the most minute detail of the business. The apples used are of the best grade of New York State, the best grade of New York State, where in our opinion is grown the best flavored apple known. The raisins used are of the best quality seeded variety. No expense is considered in procurring the very highest grade of spices, and sugar, as we all know, is always sugar, the different grades merely representing the different flavors or different granulation required for different purposes. Every particle of fruit or any other article used in the manufacture of mince meat is thoroughly cleaned and hand-picked by people trained to know what should and should not be used and in this manner the article comes to the housewife cleaner by far than she could possibly take the same articles in her own kitchen, regardless of how clean it may be, and make up the filler for her mince pie. The old idea of dirt being prevalent in quantity is today her mince pie. The old idea of dirt being prevalent in quantity is today disputed by the greatest authorities on food products. The meat used in mince meat is of the choicest and today the same corn-beef which you and I would use on our table is what is being used in Serv-us Mince Meat. There are very few ples made which can be used as handly by the housewife as mince meat for all it requires is a little water and being heated for ten minutes and it is ready for the crust and then the table and she may without fear of loss carry three or without fear of loss carry three or four packages of mince meat in her pantry, having it ready at any time for the chance occurrence of unexpected company and it will be a good dessert free from dirt. It is our thorough belief that a mince meat pie made from condensed mince meat is about as cheap a dessert as can be prepared and yet as good.

For many years mince meat was

prepared and yet as good.

For many years mince meat was considered a winter dish. Each year for the last ten our factory has had to increase its capacity during the summer months until today it runs every day of the year with a regular force of helpers. We ship goods to every part of the country the entire year. This of course means a great increase in the use of these goods over when mince meat was eaten only in the winter months which means an increased sale over the former winter consumption.
